

## Honing and polishing

# A1 YELLOW PLUS

## Polishing powder for calcareous materials

LINEA  
PROFESSIONALE

**A1 YELLOW PLUS** is a polishing powder for marbles, limestone, travertine, agglomerates and any other material containing calcium carbonate. Its formulation developed for a simple and fast application, guarantees a short working time and good performances. Compared to the other powders of FABER "A" series, this powder proves to be very simple to be applied. The product reacts with the material offering brightness and a good resistance to traffic and to stains. The product does not contain waxes.

*Faber polishing powders can be used successfully both as an alternative to the finishing process of traditional mechanical polishing, and also to restore the shine on worn surfaces in case it is not possible to intervene directly with a mechanical polisher. They can also be used to maintain surface shine on a regular basis.*

### CHARACTERISTICS AND BENEFITS

- ✓ High brightness
- ✓ High hardness degree
- ✓ Versatile
- ✓ Resistant to traffic
- ✓ Fast result

### USES

For indoor and outdoor use. Marbles, engineered stone, compact calcareous materials.

### COVERAGE

For surface **polishing**: 40/50 m<sup>2</sup>/kg

For surface **maintenance**: 50/100 m<sup>2</sup>/kg

### APPLICATION EQUIPMENT

Single disc machine with at least 1.5 HP; manual rotary brush.

Faber Chimica is able to supply the WARRIOR Single disc machine, which has a power of 2.2 HP, and is optimised for the correct application of any product.

### APPLICATION

Test on a small area before proceeding, so to ensure product suitability and final result.

Proceed by small surface portions of approx. 2 sqm each. Apply 1 or 2 table spoons of product to each surface portion. Add a few water drops and start working making concentric movements with a single disc machine and white pad, avoiding that the product dries. While polishing the product must always be kept in a creamy status by adding, if needed, a few water drops.

Continue working until the maximum brightness has been reached. The sheen degree can be easily checked during the application by removing the product now and then from the surface and evaluating the result. Rinse the surface well with water and vacuum up the superficial residue.

## Honing and polishing

### **A1 YELLOW PLUS** Polishing powder for calcareous materials

#### Polishing

On a honed or mat material use a larger quantity of product and make 20 passages at least with a single disc machine.

#### Maintenance

On a slightly worn out material use less powder and make 15 passages at least with a single disc machine.

#### EQUIPMENT CLEANING

At the end of application, the equipment used can be washed using water.

#### SAFETY

When applying the product, always use suitable personal protective equipment and follow the instructions on the product safety data sheet with care.

#### PHYSICAL AND TECHNICAL INFORMATION

|         |           |
|---------|-----------|
| Aspect: | Powder    |
| Color:  | Yellow    |
| Odour   | Odourless |
| pH:     | 2,0 ± 0,5 |

#### PRECAUTIONS:

Do not allow the product to dry while polishing

#### STORAGE

Keep the container tightly closed and store in a cool, dry place.

#### SHELF LIFE

48 months in the original, sealed packaging, stored in a cool, dry place.

#### PACKAGING

- 5 kg containers – 4 per box
- 25 kg tubs – individual loose tubs

#### HAZARD IDENTIFICATION

|     |   |
|-----|---|
| R21 | Harmful in contact with the skin  |
| R22 | Harmful if swallowed  |
| R41 | Risk of serious damage to eyes  |
| S2  | Keep out of the reach of children   |
| S13 | Keep away from food, drink and animal feedings stuff.   |
| S24 | Avoid contact with skin   |
| S25 | Avoid contact with eyes   |
| S26 | In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. |
