PORCELAIN RESTORATION CREAM

Water-based cream to restore full-body polished porcelain tiles and glazed polished porcelain tiles

PORCELAIN RESTORATION CREAM is a water-based cream to be used to restore defects on full-body polished porcelain tiles, glazed polished porcelain tiles, and glazed surfaces in general. The product has an ultra-fine micro-abrasive effect that will restore flaws and defects on the surfaces such as:

- Slight abrasions
- Scratches
- Dulness
- Disuniformity
- General wear

PORCELAIN RESTORATION CREAM acts without changing the original look of the surface and it's also part of our GLAZED POLISHED TILES RESTORATION SYSTEM.

BENEFITS

- ✓ Versatile solution
- ✓ Restores the original appearance of the material without spoiling the surface
- ✓ Even looking results
- ✓ Water-based product.
- ✓ No layering defects

USES

This product can be used on both indoor and outdoor surfaces.
This product is suitable for use on Full-body polished porcelain tiles, Glazed polished porcelain tiles (Lappato), Glazed surfaces

COVERAGE

20/30 m²/kg

APPLICATION EQUIPMENT

Single disc machine with at least 1.5 HP; manual rotary brush.

APPLICATION STEPS

Surface preparation

- Carefully clean the surface, making sure to remove any dust or dirt present. We suggest using our **DETERFUG** or our **FABER 30**, depending on the nature of the dirt and the surface type.
- We suggest applying the product on surface sections of 2 m² at a time.
- Apply the product to surfaces with a temperature of between +5 and +40°C
- Any adjacent surfaces not being treated with the product must be protected.

Application

Before applying the product is necessary to take a preliminary test on an unexposed area or unused piece of material to check the product's suitability.

- Shake the bottle well before use and pour 2/3 spoonful of product onto the surface to be treated. This amount is sufficient to treat a surface area of about 2 m².

APPLICATION STEPS

- Add a small amount of water to the cream. As a rough guide, each spoonful of product requires around 1 spoonful of water.
- As soon as the water has been added to the cream, proceed to apply it to the surface using the single disc machine, fitted with a white pad, and set to between 150 and 200 r.p.m. Continue with the single disc machine, taking care to cover the whole surface area evenly with the cream. Try to pass over each section of the floor the same number of times.
- During the application process, the mix must maintain its creamy consistency, and therefore, if it should become too dry, gradually add some drops of water.
- Continue to pass over the surface with the polisher until the result is as required. This is easy to check during application by removing a small area of product using a squeegee mop or similar and checking the surface finish.
- Once the required result has been achieved, vacuum or remove any residues from the surface and rinse with plenty of clean water.

Generally, **PORCELAIN RESTORATION CREAM** will restore the surface within 15-25 passages, but always checks depending on the type of surface

Resuming the surface use

After carefully removing any residues and rinsing the surface with water, the floor can be opened for use.

MAINTENANCE PRODUCTS

- For the daily maintenance of a surface treated with **PORCELAIN RESTORATION CREAM**, we recommend: **ALGAFLOOR**
- For heavy-duty cleaning of a surface treated with **PORCELAIN RESTORATION CREAM**, we recommend **FABER 30** or **DETERFUG**, according to the type of dirt and the material to be cleaned.

INSTRUCTIONS AND GUIDELINES

- Do not allow the product to dry during the application process. Frequently check consistency and add water as needed to return the product to its creamy state.
- Never apply the product to a wet surface
- Do not apply the product to overly heated surfaces
- Apply the product to surfaces with a temperature of between +5 and +40°C
- When applying to recently laid or grouted surfaces, wait for the adhesive or grout to cure completely.
- Before applying the product to the whole surface, it is advisable to test a small, unexposed area or unused piece to check its suitability for use.

EQUIPMENT CLEANING

At the end of application, the equipment used can be washed using water.

PHYSICAL-TECHNICAL DATA

Formula	Cream
Color	Light Blue
Odor	Lightly Scented
pH:	8,5 ± 0,5

STORAGE

Keep the container tightly closed and store in a cool, dry place.

SHELF LIFE

36 months in the original, sealed packaging, stored in a cool, dry place.
