

SHINE REPAIR LIGHT

Polishing cream that reduces defect, dullness, light scratches and dirt sensitivity from light-toned glazed polished porcelain ceramic tiles

SHINE REPAIR LIGHT is a water-based cream product to be used on glazed polished and full-body polished porcelain ceramic tile to minimize scratches and defects.

The product is a specific solution to be used on light coloured surfaces.

Thanks to its specific formulation, **SHINE REPAIR LIGHT** is suitable to

- Increase the sheen on dull areas of the surface
- Restore or reduce the visibility of scratches

SHINE REPAIR LIGHT can be also used to reduce the dirt sensibility of surfaces where the ordinary cleaning is more difficult and less effective.

SHINE REPAIR LIGHT is ready to use and it's suitable for DIY application. The application can be done manually or by using a low-speed polishing tool with a white pad. It may be necessary to execute up to 10 consecutive applications of product depending on how deep or stubborn the defects are.

The achievable result with **SHINE REPAIR LIGHT** depends on how deep or stubborn the defects are and on how carefully and precisely the application is done.

FEATURES AND BENEFITS

- ✓ Product **specifically** formulated for **light coloured polished** porcelain ceramic tiles
- ✓ **Ready to use**
- ✓ Adds excellent surface **resistance to dirt**
- ✓ It **increases** the **sheen**

Suitable for Light toned Glazed polished porcelain ceramic tiles.

COVERAGE

Depending on consumption

APPLICATION EQUIPMENT

The product is applied by using a white pad. It can be applied manually or by using a low-speed polishing tool

Abrasives and Polishes

SHINE REPAIR LIGHT- Polishing cream that reduces defect, dullness, light scratches and dirt sensitivity from light-toned glazed polished porcelain ceramic tiles

APPLICATION STEPS

Surface cleaning and preparation

1. Carefully clean the surface, making sure to remove any dust or dirt. We recommend using DEEP DEGREASER to thoroughly clean the surface.
2. Wait for the surface to dry completely before proceeding with the application of SHINE REPAIR LIGHT.
3. Make sure to protect any area of the surface not to be treated.
4. Apply the product to surfaces with a temperature that goes to a minimum of 5°C to a maximum of 40°C

Application

We recommend taking a preliminary test before applying the product to the whole surface, to check its suitability for use.

4. Shake the product well for at least 30 seconds before pouring a small amount of product onto the surface to be treated.
5. Start to buff the product on the surface with the white pad in circular motions, making sure to treat the whole surface evenly.
6. The time of the application will vary according to how deep or stubborn the defects are. While working with the product, keep checking the surface to see the achieved result. Continue to work the product until the desired result has been achieved. In case of particularly deep or stubborn defects, it may be necessary to use a rotatory hand tool with a white disk.
7. After working the product, remove all residues and rinse with plenty of water.

Drying time

8. Once the residues are removed and the surface is rinsed with water there is no need to wait for the surface to dry.

Opening to floor traffic

9. Once the residues are removed and the surface is rinsed with water the surface is ready to be used.

COMPLEMENTARY CLEANING AND MAINTENANCE PRODUCTS

After treating the surface with SHINE REPAIR LIGHT, we recommend using FLOOR CLEANER for the daily maintenance of floors, and CLEAN UNIVERSAL for the daily maintenance of tops.

INSTRUCTIONS AND GUIDELINES

- Before applying the product always clean the surface thoroughly
- Never apply the product to a wet surface
- Do not apply the product to overly heated surfaces
- Before applying the product to the whole surface, we recommend taking a preliminary test on an unexposed area to check its suitability for use.
